Financial Strategies for Right Now!

This is a practical what-to-do presentation. No unsubstantiated stock market predictions. No political views. No hype. No nonsense. You will want to attend if you are looking for straight answers and clear direction from a seasoned financial advisor with over 30 years of planning experience guiding folks through previous financial crises.

Concerns that keep most Americans up at night that we will discuss:

- Investing:** With market volatility and low interest rates, how should you be allocating your assets given the available options?
- New Government Policies:** What impact will the Biden administration have on the stock markets and your taxes?
- Tax Planning:** What tax strategies can you take advantage of while you are retired...particularly before you have to start taking Required Minimum Distributions from your IRA and 401k accounts?
- Financial Planning:** Whether you are looking for predictable income or moderate growth, how can you have your money accomplish what you want without worrying?
